mw@sheffieldcalibration.com

[Assessment](#) | [Standards](#)

Dimensional calibration laboratories are assessed to the latest version ISO 17025.

This specification is similar to ISO 9001 with regards to the Quality Management System but it has further requirements for Technical competence.

We are accredited by UKAS and assessed to ISO 17025 at a minimum of once yearly.

If you have been directed to this document then you will not be permitted to audit the laboratory.

We hold a current Quality Manual, a current Quality Statement and Quality Procedures for every section of ISO 17025 where required. We have technical procedures for each item calibrated.

The Quality Manual, Quality Statement and Procedures will not be made available for clients

[Further Standards](#) | [Company Statements](#)

Standards relating to anything other than dimension calibration and the quality management system are not held by the company.

Assertions required to satisfy your supplier stipulations are listed below.

Health and Safety is considered and applied by Sheffield Calibration employees when required.
